

# WHY STUDY WITH US

We offer **hands on training**, meaning with all our courses you actually build complete websites, mobile web, custom facebook pages or whatever your course entails. Our courses are aimed at teaching you the **techniques that matter most** in creating **successful websites**. We teach you the **latest technologies** and the best ways to implement them in all scenarios. Our tutors share their **12 years experience** that can not be found in any book. The best way to study these subjects is through our **PRACTICAL, face to face & outcomes based classes**. Where other training institutes focus mainly on teaching you the application that you use to design websites with, we focus more on the actual techniques. We do however teach you everything you need to know on how to design with a variety of applications, preparing you for working in the web design industry. Our classes will be no more than 8 students at a time so you get personal attention all the way through the course. We also offer a free refresher course at any time within a year.

**KICKSTART YOUR CAREER**
